Build a neat and practical waste collection point with Modul bin stores. The Modul collection has various store models for different container combinations. Fireproof models are also available.

Designed and manufactured in Finland.

MODUL SOLO bin store

1 x max. 370 l

Material

Powder-coated Marine Grade aluminium.

Measurements

- Depth 940 mm
- Width 1,000 mm
- Height 1,660 mm

Installation

Thanks to the adjustable mounting base, there is no need for earthwork. The bin store can be placed on slightly uneven ground.

The waste collection point must be easy to access. Make sure it does not block emergency access routes. It is recommended to get the local building and fire authorities' approval for the placement of the waste collection point.

Standard colour

 **RAL 7024**
Dark grey

MODUL DUO bin store

Material

3 x max. 360 l or 1 x 660 l + 1 x max. 240 l

Safe and stylish

Modul bin stores make building a private or public waste collection point easy. By combining bin stores of various sizes, you can create an optimal solution for your space.

Thanks to the handy locking system, only those with a key can use the collection point. The sturdy structure keeps rats away.

Modul products are made of marine grade aluminium which suits the changeable weather conditions of the North. The anti-corrosive material is not damaged by road salt or residue of household waste.

The mounting base ensures easy installation without any need for earthwork. The mounting base can also be placed on slightly uneven ground.

NB: The reference images show older models. The new models have a different handle.

MODUL MAXI SINGLE bin store

Material

MODUL FIREPROOF

A fireproof bin store can be placed next to a building wall.

A fireproof version is available for every Modul bin store model. Fireproof bin stores can be placed right next to a building.

Fireproof Modul bin stores have been tested using a VTT-developed test method (test report: VTT-S-3766-16).

According to the test, locked fireproof Modul bin stores can be placed right next to a building. This allows flexible placement even in smaller courtyards. It is recommended to get

the local building and fire authorities' approval for the placement of the waste collection point.

The waste collection point must be easy to access. Make sure it does not block emergency access routes. It is recommended to get the local building and fire authorities' approval for the placement of the waste collection point.

The aperture can be equipped with a double-cylinder Abloy LC 120 lock case, which the customer can rekey for their property's keys. Modul bin stores can also be fitted with a digital iLOQ locking system.

FEATURES AND ACCESSORIES

- Modul bin stores can be used as building blocks for a variety of combinations.
 - Their sturdy structure keeps rats away.
 - Triangular lock
 - The hatch can also be equipped with a lock body.
 - The hatch is equipped with a gas spring.
 - The doors feature special hinges that make it possible to lift the doors up in case there is snow or ice in front of the door sill.
 - High-quality powder paint, several colour options.
- The practical mounting base lowers the costs because it eliminates the need for preparatory earthwork.
 - You can order the installation through us.

Modul eliminates rat problem!

Mounting base cuts the costs

Thanks to the Modul mounting base, the bin store can be installed without any earthwork. This is a practical and cost-effective solution. The mounting base is very adjustable and it can be placed on slightly uneven ground. The mounting base can also be fixed to a solid base.

The Modul mounting base is compatible with all Modul models.
